

Service: Personal (re-)planning service – “TO DO LIST”

Purpose

The purpose of this service is to increase security, prevent social isolation, participate in various programs or occasional activities and maintain the multifunctional network around the individual. This tool will help in the planning and carrying out of the daily activity in a safer and more efficient way, also care implies social motivation and involvement. Through the "To do" section of the application, the elderly user will be helped to remember/update the planned activities.

Real case

Through the "To Do" section of the app, Armand will be notified about next activities, synchronized in the "Personal cloud" of his relatives, friends and formal caregivers. In this group Armand also designated some "reference persons" (namely, Beatrice and his son Charlie) who may be informed in case of troubles and may provide further information if needed.

How to use the SAVE service

The "To do list" section of the application ensures a configuration for memory refreshing - gathering the following activities in a list - to help the end-user to remember/update activities. The "To do list" will include 3 sections: a) "mandatory" actions - e.g. medication administration - the elderly user will confirm the fulfillment of the requirements, otherwise alerts will be issued to the elderly and caregivers; b) recommended/optional actions - administrative activities, participation in various programming or occasional activities; c) intended activities – and update of the immediate schedule term activities. The list can be updated both by the elderly user and by the caregivers.
